

Spa Guidelines

Inskiers Ski Cabin
2016-2017 Ski Season

- Shower before entering spa, removing sweat, sunscreen and makeup.
- Use supplied plastic tumblers, cups, and glasses in/around spa area.
- Unlock spa with supplied key (at right side of master-bedroom patio door).
- Put one teaspoon of supplied chlorine crystals in spa following each use.
- Replace and lock spa cover on vacating cabin. (Liability issue!)
- Keep water temperature at ~102F by setting TEMP dial to "2". (See pix below.)
- Raise water temperature by turning temperature dial clockwise to "3", **no further.**
- Alternatively, run spa's jets for 10-20 minutes before using spa.
- Lower water temperature by turning temperature dial counter-clockwise.
- **Keep spa well below 110F, else heater will turn itself off—for good.**
- **Likewise, turn jets off on vacating spa, else temperature will rise above 110F.**
- Call Larry-Spa-Guy at 530/448-6341 to restart spa—an Inskiers expense.
- Call Larry-Spa-Guy for other spa services—generally an Owner expense.

Adapted from Apres Spa Guidelines: Please shower with soap and water before using the cabin's spa, washing off lotions, sunscreens, and cosmetics. The latter items--and the residue from laundry soap in swimsuits, cycling shorts, and the like--are damaging to the spa's (extremely expensive) filters. We recommend a dedicated swimsuit for the spa. Rinse it thoroughly after each use with clear water. Or, skip the swimsuit altogether. If entering the spa would cause the water to overflow, please wait till someone leaves before climbing in. Ice!

Set spa's thermostat to "2", as shown. Leave it there 24/7/52.
